ChemLab / Reaction evidence

Experimental feasibility remains unresolved. Support means reported precedent or a source-derived structural analogy. Contradiction concerns listed atom sources; omitted reagents can change that finding. Conditions, yields and procedures are excluded.

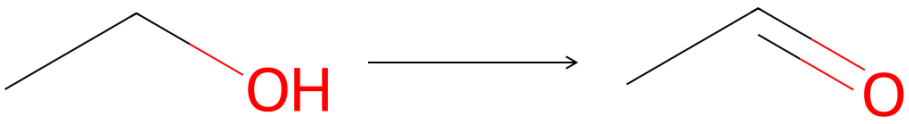
Reaction 1

Evidence outcome: unresolved



`CCO>>CC=O`

Check	Outcome / scope
atom origin	observed / Absent listed sources need investigation; counts do not certify atom balance or chemistry
conditions	not_checked / outside_requested_scope
context precedent	not_checked / knowledge_library_not_configured
contextual feasibility	unknown / no_complete_condition_free_chemical_oracle
edits	observed / Changes under supplied mapping, not a validated mechanism; absent atoms may enter unlisted by-products
exact precedent	not_checked / knowledge_library_not_configured
listed atom sources	pass / listed_element_sources_present
mapping	pass / mapped_product_atoms_have_provenance
stoichiometry	unknown / coefficients_and_byproducts_not_supplied
